DRAWING NO. D4652	TITLE AIR VALVE	REV. D	DART AEROSPACE LTD ENGINEERING ORDER		D.E.O. NO. D4652-D-1	SHEET NO. SHEET 1 OF 1	SCALE NTS	
DRAWN	RF	CHECKED		MFG. APPR.	TBD	APPROVED		DE APPR.
DATE	15.06.03	DATE	15.06.03	DATE	15.06.XX	DATE	15.06.03	DATE

PURPOSE:

THIS DEO ALLOWS THE D4652-1 AIR VALVE TO BE USED IN PLACE OF D4652-5 UNTIL STOCK DEPLETED.

NOTE: A COMPLETE D139-816-11 KIT SHOULD HAVE SAME P/N AIR VALVE.

Subject: RE: 139 Ceilings Deviation

Nigel,

Thanks for the clarification. I have a much better understanding of what happened here. My assumption had been that we were holding off ordering parts until the newer, cheaper parts were approved so that we could reduce our costs. There is certainly no Engineering objection to using the existing stock.

On the lights, the part number did not change (still D4638-1) even though the supplier did, so this is not a deviation. Both the Bruce p/n and Emteq p/n are acceptable.

On the vents, the part number changed from D4652-1 to D4652-5 because the appearance of the part was quite different, so all drawings now call up D4652-5. Suggest we get Roberto to issue a DEO that allows the D4652-1 to be used in place of D4652-5 until stock is depleted.

In both cases, we should set aside a portion of the old stock to support customers who already have the kits. Maybe 10 of the lights and 30 of the vents, or something like that.

Regards,
David

David,

Apologies for the delay in replying. After reviewing the history on these items, here's the background:

- The lights, long lead time (90+ days) and minimum quantities to get them at \$765 a piece. Plus, these had to be shipped to Mr. Rowe to incorporate in the harnesses and that added to the lead time. So again, we placed blanket P.O based on forecast and we ended up with the these quantities and we can't return them. See below.

- The plated gaspers/air vents were problematic and the lead time was long and unpredictable due to the plating rejections. So we mitigated the risk of delivery delays to our key customers by ordering them on a blanket P.O with staggered deliveries. In doing so, based on forecasted sales and the pending approval to switch to the new air vents, we ordered extra quantities to avoid shortages. These were and are customized items due to the plating selection and are non-returnable or exchangeable. In the timing of it all with the engineering change to the new vents and the low sales on the ceiling kits, we ended up with this stock. See below:

Dear Linda,

We cannot accept the plating back as they are customer specific and there is no one else that is utilizing this part in plating. We understand that there were some lateness to parts but that was due to plating reworks which are out of our control. Please let us know if you have any other questions or concerns.

Good Afternoon Connie,
We are ready to proceed with the new air valves, D4652-5, however, we still have a lot of stock of the D4652-1's, due to the lateness of all the orders last year. Is there anything you can do to issue us an RMA for the current stock of the D4652-1's?
Please get back to me at your earliest convenience.

Thank You,

Linda Lacelle

Nigel/Bill,

Can you clarify what is going on here. About 6 months ago, Operations pushed Engineering to change the lights and air vents for the AW139 ceilings because the previous lights and air vents were waaaaaaay too expensive. Now we have 3 years supply of the old expensive parts. I'm confused.

Regards,
David

Re: 139 Ceilings

We have old stock quantities of	D4652-1 air Valve	QTY 163. (enough old stock for 13 sets)	New Stock Qty. 0
Old stock quantity of	D4638-1 light	QTY 73. (enough old stock for 24 sets)	New Stock
Qty. 0			

We do not have any orders on hand for ceilings and I have no idea if there are any pending orders.
Please advise

Daryl

Harvey,

We have stock for about 3 years, Ok to keep some old ones in case, but we should be reducing inventory first.

Mario,

Daryl,

I thought we were going to move to the new parts and not use up all the old stock in case somebody wanted/needed replacement parts.

Just a little curious, why we are going backwards??

Harvey

Can you please provide a standard email that we can use to make D4634-xxx panels at Rev. F until old stock parts are used up.

We will also need same type document to produce D4635-xxx panels as per Rev. E until old stock parts are used up.

We will not use unmatched parts (old/new on same set panel) as old stock diminishes.

Daryl
